## Professional Summary

---

Motivated and detail-oriented Frontend Developer with a strong foundation in HTML, CSS, JavaScript, React, and Git. Passionate about building responsive and user-friendly web applications with a keen eye for design and functionality. Skilled in version control and UI/UX design, ensuring seamless collaboration and modern aesthetics in web development. Eager to contribute technical expertise and creative problem-solving abilities to a dynamic team.

## Education

---

Jawaharlal Nehru Technological University Kakinada

2020 - 2025

- Computer Science with Artificial Intelligence
- GPA: 7.23/10.0

## Projects

---

### Streaming App

[Deployment Link](#)

- Built a Netflix Clone app enabling users to see the movies, TV shows, and series.
- Integrated TMDB real-time dataset and MongoDB to store user login data and search history and manage user preferences.
- Integrated JWT authentication for secure user sessions and bcryptjs for password encryption.
- Optimized API calls using axios for efficient data retrieval. Utilized React Router DOM for smooth navigation and nodemon for automatic backend updates.

**Tools Used:** Express, bcryptJs, nodemon, dotenv, axios, jsonwebtoken, mongodb, react-router-dom

### Luckytrendz Boutique

[Deployment Link](#)

- Developed an interactive Boutique Website using HTML, CSS, and JavaScript.
- Integrated JavaScript-based form validation for a better user experience for login/signup functionality and stored them in local storage.
- Implemented CRUD operations using JavaScript to manage boutique inventory dynamically. Created and utilized JSON data for structured product information storage.
- Integrated local storage for retrieving and maintaining user and product data persistently.

**Tools Used:** HTML, CSS, JavaScript

## Certifications

---

- Achieved Certificate of USA Advanced Software Engineering from Walmart
- Achieved Certificate of Software Engineering from Goldman Sachs
- Achieved Certificate of Nordics Developer from Accenture

## Technical Skills

---

**Programming Languages:** C, Python, MYSQL

**Frontend Languages:** HTML5, CSS3, JavaScript, React

**Frameworks:** Bootstrap, Tailwind CSS

**Tools:** Git, GitHub, VS Code, Postman

**Database:** SQL, MONGODB
